SMS Message Alarm Gateway Product Model:HMI2004-A9-GPRS

Function:

HMI2004-A9-GPRS (Hongdian version) is hardware gateway with GPRS Modem to realize short message alarm、 short message notification、 short message transmission etc. functions. Matching configuration software is X2SMS.

GPRS Modem must support GSM mode only (SIM card of china mobile、 china unicom、 no china telecom), and must be hongdian's cellular serial modem.

Application:

The device need to connect HMI2004-A9-GPRS hardware gateway. Alarm condition must be set with HMI2004-A9-GPRS. When the device reaches the preset alarm point , it triggers the HMI2004-A9-GPRS to send the alarm information to GPRS Modem , finally GPRS Modem send SMS information to user's mobilephone.

Runtime environment:

OS: Windows XP/Win 7/Win8/Win10/Win Server 2003/Win Server2008/Win Vista etc.

Browser: IE11 (and above) 、 Safari、 Google Chrome、 firefox、 Opera etc.

Register Type&Num

Number of Registers is dynamic, each register can be builded up to 256 points.

- Green software and Free Installation;
- close to 200 protocols;
- browser, set up and monitor by WEB;
- Line convert、 fetch bit 、 Hubyte & Lobyte convert;
- Internal variable can check device online & offline status;
- Friendly software configuration tool, complete 1024 points in 20m;
- new Protocol can be completed in 2 weeks;

Hardware Parameter:

CPU: 400MHz	Power Supply: AC/DC 12~24V
Memory: 64M High performance memory	Size(L×W×H): 160*116*37mm
System: WINCE	Weight: 500g
Power: 8W	Material: carbon steel
Flash: 256M	Setup: DIN-Rail 、 Wall-hanging
Interface: 2Ethernets 4Serial Ports(4 RS485)	Temperature: -20~70°C(working) -40~85°C(storage and transportation)
Network: 2 High-performance 100M/10M adaptive Industrial Network Card, support AUTO MDI/MDIX	Humidity: 20% ~ 90%, no condensation (work), 15% ~ 95%, no condensation (storage and transportation)

SMS Message Alarm Gateway Product Model:X2SMS-GPRS

Function:

X2SMS-GPRS(Hongdian version) is hardware gateway with GPRS Modem to realize short message alarm、 short message notification、 short message transmission etc. functions. Matching configuration software is X2SMS. Users can set user group to receive message by X2SMS.

GPRS Modem must support GSM mode only (SIM card of china mobile、 china unicom、 no china telecom), and must be Hongdian’s cellular serial modem.

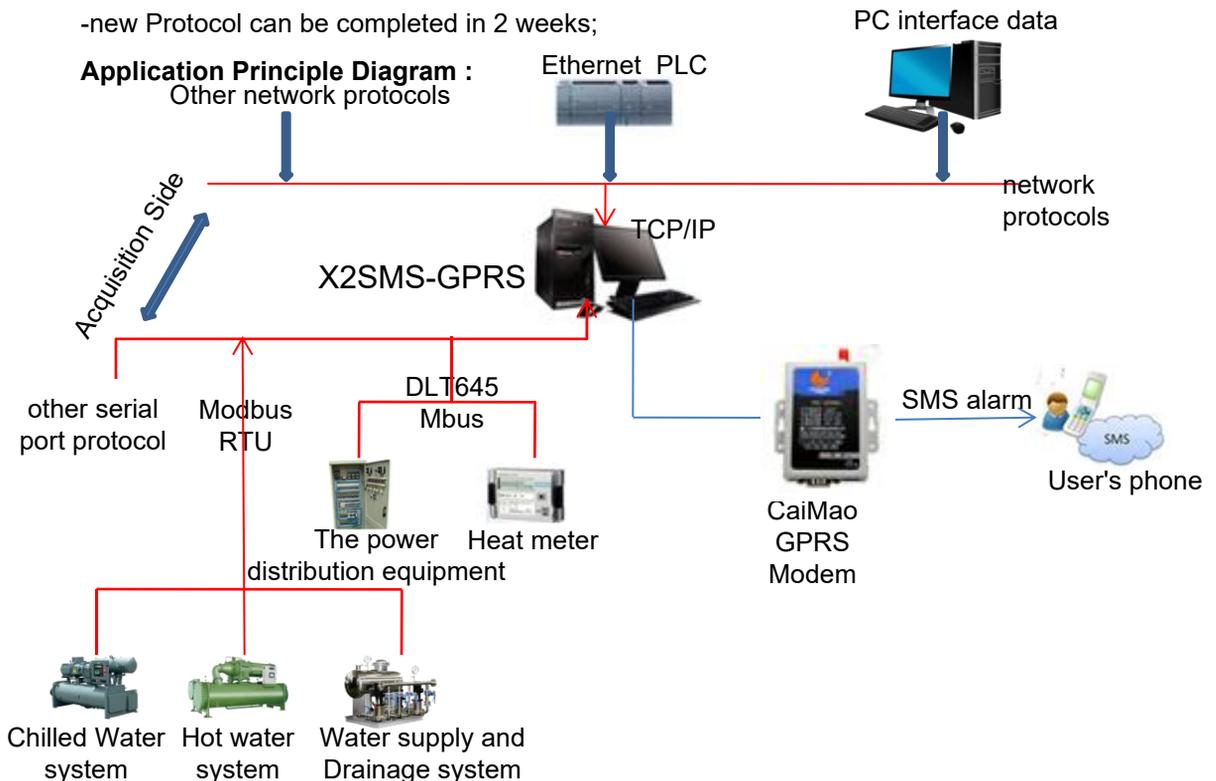

Application:

The device need to connect X2SMS-GPRS hardware gateway. Alarm condition must be set with X2SMS-GPRS. When the device reaches the preset alarm point , it triggers the X2SMS-GPRS to send the alarm information to GPRS Modem , finally GPRS Modem send SMS information to user’s mobilephone.

Software Features:

- Green software and Free Installation;
- close to 200 protocols;
- browser, set up and monitor by WEB;
- Line convert、 fetch bit 、 Highbyte & Lobyte convert;
- Internal variable can check device online & offline status;
- Friendly software configuration tool, complete 1024 points in 20m;
- new Protocol can be completed in 2 weeks;

SMS Message Alarm Gateway Product Model:M2S-Softkey M2S-USBkey

Function:

Mail2SMS is short message alarm gateway with GPRS Modem to realize short message alarm、 short message notification、 short message transmission etc. functions. Sound Alarm is sounded by PC's speaker.

GPRS Modem must support GSM mode only (SIM card of china mobile、 china unicom、 no china telecom), and must be hongdian's cellular serial modem.

Working principle :

Mail server is installed on the user's computer, the alarm information is sent to the mailbox through the local network, and then the mail information is received in the Mail2SMS, and the SMS is sent to the user's mobile phone by the GPRS Modem.

Software advantages :

configurable, simple operation, stable and reliable, you can edit the contents of the alarm. The user list can support import and export for ease of administration.

Runtime environment:

OS: Windows XP/Win 7/Win8/Win10/Win Server 2003/Win Server2008/Win Vista etc.

Hardware Parameter:

GPRS Modem must support GSM mode only (SIM card of china mobile、 china unicom、 no china telecom), and must be hongdian's cellular serial modem.

Software Features:

- Green software and Free Installation;
- supports reading the Mail mailbox server to the SMS alert server;
- support import and export EXCEL, faster and more convenient;
- M2S-USBkey dongle licensing, plug and play;
- M2S-Softkey soft license, easy to use;
- Software Mail2SMS is configurable, easy to operate, stable and reliable, and can edit the contents of the alarm freely;

Application Principle Diagram :

SNMP Gateway **Product Model:** SNMP1002-ARM(DIN-Rail)

Function Description:

X2SNMP called SNMP gateway can invert any device protocol into SNMP interface, then the computer room management system and other SNMP client can access and monitor the third party data through SNMP interface.

Working principle

The field device connects the "X2SNMP" hardware gateway, the gateway collects the data to provide the SNMP proxy interface, and the SNMP client can manage and monitor the field device by accessing the X2SNMP hardware gateway.

Runtime environment:

OS: Windows XP/Win 7/Win8/Win10/Win Server 2003/Win Server2008/Win Vista etc.

Browser: IE11 (and above) 、 Safari、 Google Chrome、 firefox、 Opera etc.

Software Features:

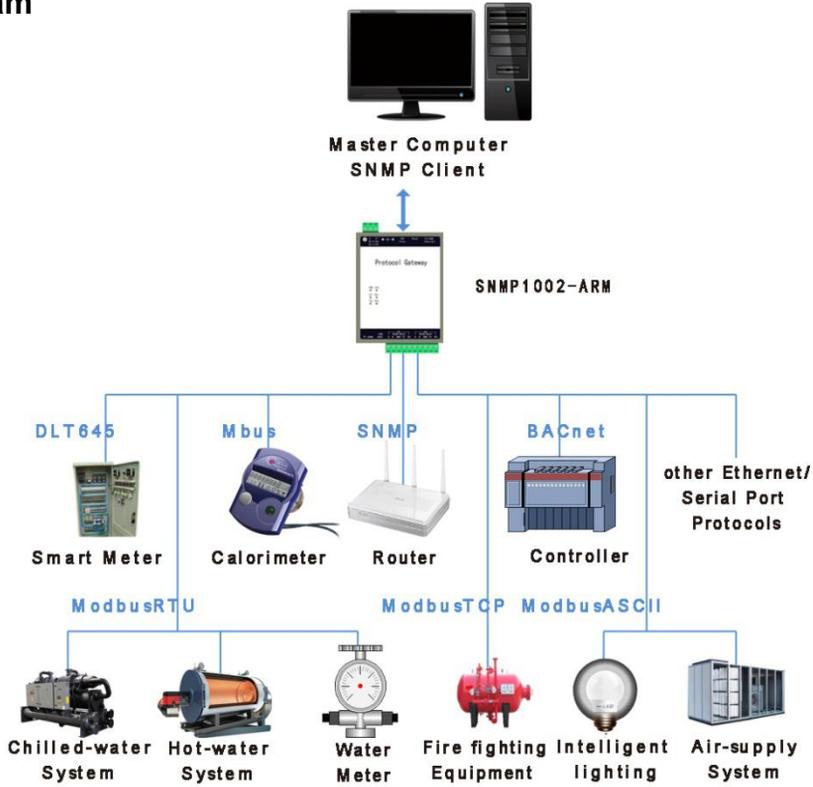

-Green software and Free Installation;

- close to 200 protocols;
- browser, set up and monitor by WEB;
- Line convert、 fetch bit 、 High byte & Low byte convert;
- Internal variable can check device online & offline status;
- In PC monitoring mode, X2SNMP tool can be used for PC simulation;
- Friendly software configuration tool, complete 256 points in 10m;
- new Protocol can be completed in 2 weeks;

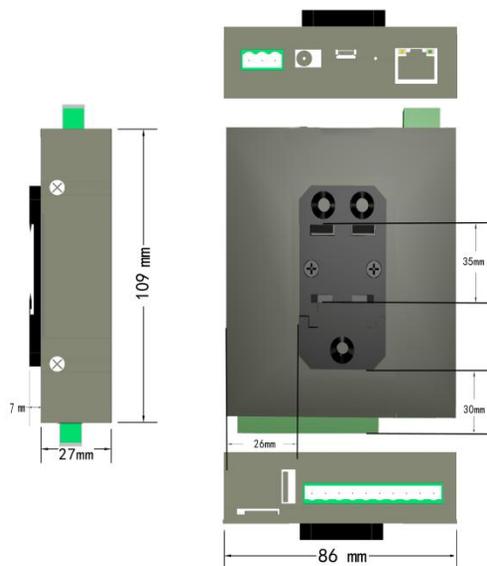

Hardware Parameter:

CPU: 240MHz	Power Supply: AC/DC 24V
Memory: 64M High performance memory	Size(L×W×H): 129*86*34mm
System: LINUX	Weight: 350g
Power: 6W	Material: Galvanized Steel
Flash: 128M	Setup: DIN-Rail
Interface: 1Ethernet 2Serial Ports(2 RS485/ 2 RS232)	Temperature: -20~70°C(working) -40~85°C(storage and transportation)
Network: High-performance 100M/10M adaptive Industrial Network Card, support AUTO MDI/MDIX	Humidity: 20% ~ 90%, no condensation (work), 15% ~ 95%, no condensation (storage and transportation)

IEC104 Gateway Product Model:IEC2004-ARM

Function Description:

X2IEC104 is a protocol gateway, X means different communication protocols, and IEC104 is the ultimate support for IEC104 protocol. The user can configure according to the communication protocol of field devices, IEC104 protocol into standard. In the end PC simulation is correct, uploaded to the hardware protocol conversion gateway. Note that this acquisition terminal and the originator of the gateway to the IEC104 register based address is from the beginning of 0.

Working principle

Hardware gateway supports multiple protocol conversion, can solve PLC, air conditioning, elevator, fire control, lighting control system, electric meter, water meter of different products, through the hardware gateway will be Modbus, BACnet and other various different protocol into IEC104 protocol, so that the IEC104 client configuration software can access the site through the X2IEC104 gateway equipment, implementation data acquisition, data monitoring, and remote reading scene temperature, and alarm status data.

Runtime environment:

OS: Windows XP/Win 7/Win8/Win10/Win Server 2003/Win Server2008/Win Vista etc.

Browser: IE11 (and above) 、 Safari、 Google Chrome、 firefox、 Opera etc.

Software Features:

Note: the gateway register number is dynamic support, each register can be built up 1024 points.

IEC104 Register Types	IEC104 Register Numbers
Single Point (Single point remote communication)	1024 (0~1023)
Measure Float (Short floating point telemetry)	1024 (0~1023)

IEC104 Gateway Product Model:IEC2004-ARM

Software Features:

- Green software and Free Installation;
- Support close to 200 protocols into IEC104 server;
- browser, set up and monitor by WEB;
- Line convert、 fetch bit 、 High byte & Low byte convert;
- Internal variable can check device online & offline status;
- Support 2 types of Register:Single Point、 Measure Float;
- Friendly software configuration tool, complete 1024points in 20m;
- new Protocol can be added in 2 weeks;

Hardware parameter:

CPU: 400MHZ	Power: AC/DC 12~24V
Memory: 64M High performance memory	Size(L×W×H): 160*116*37mm
System: WINCE	Weight: 500g
Power: 8W	Material: carbon steel
Interface: 2Ethernets 4Serial Ports(4 RS485)	Setup: DIN-Rail 、 Wall-hanging
Flash: 256M	Temperature: -20~70°C(working) -40~85°C(storage and transportation)
Network: 2 High-performance 100M/10M adaptive Industrial Network Card, support AUTO MDI/MDIX	Humidity: 20% ~ 90%, no condensation (work), 15% ~ 95%, no condensation (storage and transportation)

SQL2BACnet

SQL2BACnet Product Model: StB-Softkey StB-USBkey

Function Description:

SQL2BACnet is by Shanghai sure rao automation technology co., LTD., independent research and development of new software, this software is mainly used to solve most of building automation software cannot access the SQL database.

Working principle

Install the software in the equipped with SQL database computer, by reading and "SQL2BACnet" SQL database data into BACnetIP again from the station, so other configuration software on the computer just by BACnetIP agreement, can not only realize to monitor and control the SQL database.

Runtime environment:

OS: Windows XP/Win 7/Win8/Win10/Win Server 2003/Win Server2008/Win Vista etc.
 Browser: IE11 (and above) 、 Safari、 Google Chrome、 firefox、 Opera etc.

Application Fields:

- to solve the data access SQL database of the Johnson Metasys configuration software
- to solve the Bactalk BAS system access SQL database
- solve the Siemens Insight configuration software access SQL database
- solve the SQL database on the viewlogic software of hin building automatic control system
- to solve the software access SQL database of olis inc
- ...

Software Features:

- green and free installation, supporting Chinese and English;
- support to read SQL server to BACnet IP and BACnetMSTP server;
- support nine BACnet object AI/AO/AV/BI/BO/BV/MI/MO/MV, each object support 2048 points, 18432 points;
- support import and export EXCEL, easy to configure, save time;
- easy to use configuration software SQL2BACnet;
- SQL2BACnet product series:
